ENJAM HYZMATLARY

01 ABOUT THE COMPANY

Reliable Engineering Partner for the Development of Turkmenistan's Oil & Gas Industry

KUWWATLY ENJAM HYZMATLARY is a Turkmen engineering company focused on integrated engineering solutions, industrial equipment supply, and technical services for the oil & gas, gas processing, and energy industries.

Our goal is to support the development of Turkmenistan's advanced industrial infrastructure through modern technology, engineering expertise, and a commitment to reliability, efficiency, and long-term partnerships.

EQUIPMENT SUPPLY

High-quality industrial equipment and materials from trusted global manufacturers.

ENGINEERING SOLUTIONS

Comprehensive engineering design and project solutions tailored to industry needs.

INSTALLATION & COMMISSIONING

Professional installation, testing and commissioning for reliable and safe operations.

TECHNICAL SERVICE

Ongoing maintenance, inspections and technical support to ensure maximum uptime.

MODERNIZATION

Upgrading and retrofitting solutions to improve performance, efficiency and service life.

Our Mission

To contribute to the sustainable development of Turkmenistan's oil & gas industry by delivering reliable engineering solutions, advanced technologies and exceptional service.

Reliability

Efficiency

Innovation

02 | KEY BUSINESS DIRECTIONS

ENGINEERING

We deliver complete engineering solutions from concept to commissioning.

GAS TURBINE TECHNOLOGIES

We provide advanced gas turbine technologies for reliable and efficient power generation.

COMPRESSION SYSTEMS

We design and supply high-performance compression systems for critical applications.

OIL & GAS SERVICES

We deliver integrated oil and gas services to ensure safe, efficient and sustainable operations.

AUTOMATION

We implement advanced automation and control systems for higher productivity and operational safety.

MODERNIZATION

We upgrade and modernize existing facilities to extend asset life and improve performance.

Technology | Experience | Reliability | Development

ENJAM HYZMATLARY

03 GAS COMPRESSION UNITS

Integrated engineering solutions for gas transportation infrastructure, including equipment selection, supply, installation, commissioning, and service of gas compression units.

- Engineering & Technical Consulting
- Equipment Selection & Supply
- Installation & Commissioning
- Operation & Service Support

Solutions For:

- Main Gas Pipelines
- Compressor Stations
- Booster Units
- Gas Treatment Facilities

04 GAS TURBINE TECHNOLOGIES

Modern gas turbine drives and power systems for oil and gas facilities. From supply and engineering integration to commissioning and service, we deliver reliable, high-performance solutions tailored to the needs of Turkmenistan's energy sector.

HIGH POWER
Reliable high-capacity power for continuous operations.

EFFICIENT OPERATION
Optimized performance with lower fuel consumption and reduced emissions.

ADVANCED CONTROL SYSTEMS
Intelligent control and monitoring for maximum reliability and availability.

Gas Turbine Drives
Robust and reliable turbine drives for compressors, pumps and mechanical equipment in oil and gas facilities.

Energy Solutions
Integrated power generation solutions to meet continuous and peak power demands.

Intelligent Control
Advanced control and monitoring systems ensuring safe, efficient and stable operation.

KUWWATLY
ENJAM HYZMATLARY

05 COMPRESSION SYSTEMS

Centrifugal Compressors and Electric Drive Systems

Reliable compression solutions for the transportation and processing of natural gas, delivering high performance, energy efficiency and operational safety for the oil and gas industry.

- High Energy Efficiency
- Safe and Reliable Operation
- Process Integration
- Long Service Life

Centrifugal Compressors

Electric Drive Units

Cooling Systems

Lubrication Systems

Instrumentation & Control

Natural Gas Compression | Electric Drive Systems | Energy Efficient Operation | Integration & Reliability

06 SERVICE & MODERNIZATION

KUWWATLY ENJAM HYZMATLARY

Reliable Performance Today. Greater Capabilities Tomorrow.

We provide comprehensive service, repair, diagnostics, overhaul, and modernization of compressor and gas turbine systems, ensuring maximum reliability, efficiency, and long-term value for your assets. Our experienced engineers combine OEM standards, advanced technologies, and local expertise to keep your equipment running at peak performance and ready for the future.

DIAGNOSTICS

Advanced condition monitoring and diagnostics to detect issues early and prevent unplanned downtime.

TECHNICAL MAINTENANCE

Planned and corrective maintenance to ensure safe, reliable, and efficient operation.

MAJOR OVERHAUL

Complete disassembly, inspection, repair, and reassembly to restore original performance and reliability.

MODERNIZATION

Engineering upgrades and retrofits to increase capacity, efficiency, reliability, and compliance with latest standards.

HIGHER RELIABILITY

INCREASED EFFICIENCY

EXTENDED SERVICE LIFE

LIFECYCLE SUPPORT

07 | AUTOMATION & DIGITAL SOLUTIONS

KUWWATLY ENJAM HYZMATLARY

Modern automation systems for reliable, efficient and safe operation of industrial facilities.

SCADA
Collection, visualization and control of process operations

Monitoring
Real-time control of operating parameters

Diagnostics
Vibration control and remote equipment diagnostics

Safety
Process automation and improved operational safety

From Data to Efficient Decisions

KUWWATLY
ENJAM HYZMATLARY

08 | DRILLING & INDUSTRIAL EQUIPMENT

Integrated engineering solutions for drilling operations and oilfield infrastructure, including equipment supply, spare parts, service of hydraulic and mechanical systems, and modernization of industrial equipment.

- EQUIPMENT & SPARE PARTS SUPPLY
- SERVICE MAINTENANCE
- HYDRAULIC & MECHANICAL SYSTEMS
- INDUSTRIAL MODERNIZATION

Our Capabilities:

DRILLING RIG EQUIPMENT PACKAGES

SPARE PARTS & CONSUMABLES SUPPLY

HYDRAULIC & MECHANICAL SERVICE

INDUSTRIAL EQUIPMENT UPGRADING

ENGINEERING SUPPORT FOR DRILLING OPERATIONS

DIAGNOSTICS & PREVENTIVE MAINTENANCE
